

## Fleet Job Description

V-317

### HOW TO APPLY:

To apply for this opportunity, you must complete an application on our website. You can do this by selecting the opportunity you want to apply for in the "Job Applications" drop down menu. Once you submit an application, a hiring Manager will contact you.

<https://amscontractingservices.com/>

**IN ORDER TO QUALIFY FOR THIS OPPORTUNITY, YOU MUST HAVE**

**A ¾ TON (F-250 OR 2500) OR LARGER TRUCK**

**AND**

**A 12" VERTICAL ADJUSTMENT LOCKING JAW PINTLE HITCH (1,850lb tongue rate) WITH 2-5/16 ball**

Fleet transportation drivers provide support to telecom and utility companies in the immediate aftermath of devastating events including hurricanes, tornadoes, severe winter storms, and power outages. Drivers will transport assets such as generators, bunkhouses, shower houses and other trailers for our clients to use at base camp operations. Typically, you will be called to transport assets after a major disaster such as a CAT 3 hurricane or larger.

Drivers are not responsible for setting up these facilities. For contractors who are interested, we have opportunities to stay on at the site as a General Labor worker. This is not a requirement, but contractors who choose to stay are given priority on the first transport runs when the yard breaks down. You can read about our General Labor work, and our other opportunities on our website.

This is a great opportunity for hot shot drivers, individuals who are self-employed or an existing business that wishes to increase its revenue by utilizing equipment or trucks it already owns.

**Listed below are the requirements for this job and information about our company.**

#### **Basic Requirements:**

- You Must be 18 or older with a valid driver's license and be able to pass a background check
- Understand this is an on-call position and we respond whenever we have a request from our client
- Be reliable and able to travel on short notice
- Have computer literacy skills and the ability to enter completed work details into an online system
- Follow verbal and written instructions
- Own a smartphone and be comfortable utilizing it for work
- Have basic PPE: hard hat, safety vest and safety boots with reinforced toe

#### **Truck and Equipment Rates:**

- ¾ ton (2500 or F250) or larger truck that is equipped with an electric brake controller
- 4X4 is recommended although not required. However, when working winter storms or deploying in mountain regions, 4x4 is required.
- 12" Vertical adjustment locking jaw Pintle Hitch (1,850lb tongue rate) with 2-5/16 ball
- Have basic PPE hard hat, safety vest and safety boots with reinforced toe

**Compensation Details:**

- Contractors can earn up to \$2,000 a run.
- Contractors are either paid an hourly rate or per LOADED mile, and this is dependent upon what contract you are working.
- Some contracts also reimburse fuel expenses.
- We dispatch contractors according to their location and what makes logistical and financial sense.
- Contractors are paid within 14 days of the completion of an event. This is a general maximum time; you can get paid earlier depending on the contract.
- All positions are 1099 Independent Contractor

**ABOUT THE COMPANY:**

Aligned Management Solutions, LLC is a growth-oriented company that is partnered with a primary vendor as a national leader in business continuity and disaster recovery operations. We deploy contractors to help businesses recover from hurricanes, tornados, winter storms, floods, and other unplanned events by providing general and skilled labor contractors. We also provide transportation with off-road equipment in hard-to-reach locations like icy mountain tops or terrain that becomes inaccessible by conventional means. Our network of contractors have the skills to assist our clients in meeting their goals. We tailor our operations to our clients needs and will find the equipment or contractors necessary to get the job done. Rest assured, if there is a service needed, we have the people and the power to make it happen! The AMS Network, aligning contractor management with business solutions.
